

Figure 6-8. 3-HLP time series for analysis periods 1 and 2 of the offshore distance from HB01, along the main transect of the indicated isotherms where they intersect the bed. No line indicates the isotherm has surfaced. The middle panel is sea-level (bottom pressure) from HB07, and the top panel the along- (solid line) and across-shelf (red line shaded) wind components from HB07. Ticks on the time axis are at 0000 GMT for each day.
